Immunoblot

Western blot analysis of U2OS-hGR cells expressing WT, 203A, or 211A mutants. The blot shows protein levels for GR-P-203, GR-P-211, and HA (Total GR) across six lanes (1-6). Lanes 1-3 are WT, lanes 4-6 are 203A, and lanes 7-9 are 211A. Dex treatment is indicated by '+' in lanes 2, 5, and 8.
